

03 Mining Discovers New Zone At Marban

03Mining

03 Mining Inc. (TSX.V: 0III)

03 Mining provided new drilling results from the Marban project on its Malartic Property in Val-d'Or, Québec, as part of its well-funded 150,000 metre drilling program.

Current drilling on the Marban project focuses on expanding mineralisation outside of the proposed pit areas outlined in the PEA released in September 2020.

03 Mining Discovers New Zone At Marban Project and Expands Mineralization Outside of Pit

Toronto, February 4, 2021 – 03 Mining Inc. (TSX.V: OIII; OTCQX: OIIIF) (“03 Mining” or the “Corporation”) is pleased to provide new drilling results from the Marban project on its Malartic Property in Val-d’Or, Québec, as part of its well-funded 150,000 metre drilling program.

Current drilling on the Marban project focuses on expanding mineralization outside of the proposed pit areas outlined in the Preliminary Economic Assessment (“PEA”) released on [September 08, 2020](#).

The 2020-2021 drilling program consists of 50,000 metres to test extensions of the deposits and zones outside of the PEA pit areas. New drilling results from seven drill holes include:

03 Mining – Marban Drilling Highlights:

- **1.2 g/t Au over 9.7 metres** in hole **03MA-20-012** and **2.0 g/t Au over 5.4 metres** in hole **03MA-20-015** in a new zone named Golden Bridge Zone
- **1.5 g/t Au over 6.3 metres** in hole **03MA-20-028** near-surface outside of Kierens PEA pit shell
- **34.8 g/t Au over 1.2 metres** in hole **03MA-20-013** near-surface inside the Kierens PEA pit shell

- **13.5 g/t Au over 1.3 metres and 2.8 g/t Au over 4.3 metres** in hole **03MA-20-013** associated with albitised dykes
- **4.6 g/t Au over 1.2 metres** in hole **03MA-20-012**, including **9.6 g/t Au over 0.5 metre** at Gold Hawk

A 3D-model of the Malartic property and the Marban project is available on the Company's website at <https://o3mining.com/presentations/drill-results>.

Management comments

"Late last year, we published a positive PEA on Marban and committed to making it even better through continued exploration.

By investing the time and money into our drill program we continue to grow the various Marban deposits and the results will be included with the next resource update, which will underline how the development of Marban is becoming an even more attractive possibility.

Drilling has successfully intercepted mineralization in new areas including what we think is a new parallel structure to Marban called Golden Bridge, which after more work, could be brought into the project economics and further add to the benefits of a future production scenario"

President and CEO José Vizquerra.

The new Golden Bridge zone discovery is defined by three drill holes covering an area of 175 metres by 100 metres at 175 metres vertical depth and remains open to the west, at depth, and up to the surface.

03 Mining believes that the near surface Golden Bridge zone offers the potential to generate a new open pit resource, just 200 metres from the PEA Norlartic pit.

Initial interpretation suggests that the Golden Bridge zones are associated with an east-west trending splay of the Marbenite and Norbenite shears. If proven, this would offer a lateral exploration potential of an additional 650 metres along the Golden Bridge structure.

The two intercepts associated with albitized dykes in **03MA-20-013** are 65 meters apart in the hole and are located at a vertical depth of 450 metres on average. The zones remain open laterally and at depth.

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com for information.
