AMERICAN CREEK'S JV PARTNER TUDOR GOLD IDENTIFIES HIGH- GRADE GOLD BRECCIA SYSTEM AT THE GOLDSTORM DEPOSIT, TREATY CREEK, GOLDEN TRIANGLE, BRITISH COLUMBIA

▪

Cardston, Alberta—(Newsfile Corp. – February 2, 2024) – **American Creek Resources Ltd. (TSXV: AMK) (“the Corporation” or “American Creek”)** is pleased to announce that project operator and JV partner Tudor Gold (“Tudor”) has provided an update on the recent identification of a high-grade gold system within the Goldstorm Deposit and a brief overview of the successful expansion of the Goldstorm Domains from the 2023 drill program (the “Program”) at the flagship property, Treaty Creek, located in the heart of the Golden Triangle of Northwestern British Columbia.

Ken Konkin, Tudor Gold President and CEO, commented:

“We are extremely pleased to announce that we have delineated a high-grade gold system associated with a quartz-dominant veinlet and stringer stockwork system, named Supercell One (SC-1).

“This represents a significant economic target within the CS-600 domain. Our current Mineral Resource Estimate (MRE) caps gold equivalent (AuEQ) grades at 8.0 g/t AuEQ and therefore does not include these higher grades.

“Our current concept is that the SC-1 system, like the higher-grade R-66 domain, may represent a late-stage gold-dominant event that, in part, over prints the primary mineralization of the Goldstorm Deposit.

“This is significant, as these smaller, higher-grade systems have the potential to streamline start-up plans, allowing for rapid extraction of gold with the possibility of substantially lower capital expenditures compared to a much larger conceptual bulk tonnage operation.

“Additionally, our technical team has completed the geologic modelling and domain delineation with the incorporation of the 2023 drilling data. Updated mineral domains show significant expansion of the Goldstorm Deposit in several areas.

“These maps indicate how the drilling conducted in 2023 has the potential to convert several areas of the deposit from Inferred Mineral Resources to Indicated Mineral Resources.

“Despite the aggressive exploration and expansion of the Goldstorm Deposit, it remains open in all directions and at depth. The Company is currently in the process of updating the MRE for the Goldstorm Deposit and is expected to release the updated MRE within Q1 of 2024.”

**City Investors Circle is based in
the financial district in the City
of London**

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure

interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.
