# AMERICAN CREEK'S JV PARTNER TUDOR GOLD INTERSECTS WIDE GOLD INTERVALS IN TWO 150 METER NORTHEAST STEP-OUT HOLES AT THE GOLDSTORM DEPOSIT, TREATY CREEK PROPERTY, GOLDEN TRIANGLE BRITISH COLUMBIA

- 

Highlights Include 1.31 g/t AuEQ over 337.5 Meters in Hole GS-23-167 and 1.01 g/t AuEQ over 412.5 Meters in Hole GS-23-164

Cardston, Alberta–(Newsfile Corp. – July 11, 2023) – **American Creek Resources Ltd. (TSX.V: AMK) (OTCQB: ACKRF) ("the Corporation" or "American Creek")** is pleased to announce that project operator and JV partner Tudor Gold ("Tudor") has produced the first set of drill results for the 2023 exploration program (the "Program") at the flagship property, Treaty Creek, located in the heart of the Golden Triangle of Northwestern British Columbia.

Since the beginning of this year's Program, Tudor has successfully completed over 12,000 meters (m) of drilling, within areas encompassing the Goldstorm Deposit and the Perfectstorm Zone. The five drill holes reported in this release are located in the northeastern area of the Goldstorm Deposit. Click to view ***plan map and cross sections.***

**Darren Blaney, CEO of American Creek** commented:

*"It looks like we are off to a great start with the 2023 drill program. More step outs with wide intervals of strong mineralization and another significant expansion of the Goldstorm.*

*"What's not to like?"*

**Ken Konkin, Tudor's President and CEO, commented:**

*“We are very pleased to report the discovery of continued strong gold, silver, and copper mineralization outside the previously defined resource area with 150-m step-out holes GS-23-164 and GS-23-167.*

*“The overall strength and consistency of the Goldstorm system continues to amaze our technical team as the deposit remains open in all directions and at depth.*

*“Our continued success of these critical first-round results has prompted us to build several more drill pads designed to test all northern aspects to all domains as there appears to be no end in-sight to the Goldstorm Au-Cu-Ag mineralization as of yet.*

*“Equally important was the success of definition hole GS-23-168 within a vast block of the 300H Domain. The goal is to increase drilling density to potentially upgrade this large block into the Indicated category from the Inferred category of the Mineral Resource.*

*“GS-23-168* ***intersected 309.0 m of 1.02 g/t AuEQ including an enriched portion averaging 1.40 g/t AuEQ over 204.0 m, with a core of 1.99 g/t AuEQ over 75 m****.*

*“Based on these very encouraging results, we have decided to pursue the northern aspects of the Goldstorm Deposit with five drill rigs, leaving one exploration rig to further drill-test the Perfectstorm Zone.”*
