Tudor Gold management comments

> "The 2021 drilling program at Treaty Creek has progressed very well with peripheral drilling at Goldstorm.
>
> "We are consistently encountering strong sulphide mineralization along the limits of the three identified mineral resource domains, namely the 300 Horizon, CS-600 and DS-5 Zones.

"The Goldstorm Deposit remains open to expansion in all directions and at depth. In addition to potentially adding new gold equivalent (Au Eq) ounces to the mineral resource, we will attempt to convert as much of the 7.9 million Au Eq ounces of Inferred Resources to the Measured and Indicated Resource categories that currently total 19.41 million ounces of Au Eq.

"Concurrent with the definition and exploration drilling on the Goldstorm Deposit, one drill will continue with 300-meter (m) step-out holes at Perfect Storm and one drill will test the central area of the Eureka Zone. Exploration crews will also be working on new areas within the project area in order to define new drill targets."

Treaty Creek, Goldstorm Drilling Highlights include:

- Very consistent, near-surface 300 Horizon intercepts such as GS-21-103 that intersected 801.0 meters of 0.704 g/t Au Eq including a strong upper pulse of enrichment averaging 2.025 g/t Au Eq over 75.0 meters or 168.0 meters of 1.391 Au Eq.
- An impressive 474.0 m intercept of DS-5 in hole GS-21-110 that averages 1.039 g/t Au EQ including 216.0 meters of 1.712 g/t Au Eq or 130.5 meters of 2.389 g/t Au Eq.
- All drill holes hit significant gold mineralization (GS-21-107 was lost before encountering the DS-5 Zone and that hole will be re-drilled).
- Goldstorm Deposit remains open in all directions and at

depth as drilling continues.
