

American Creek's JV Partner Intersects 45.5 M Of 3.73 g/t AUEQ

American Creek Resources (TSX.V: AMK)

Announced that project operator and JV partner Tudor Gold has produced the fifth set of drill results for the 2023 exploration program at the flagship property, Treaty Creek, located in the heart of the Golden Triangle of NW British Columbia.

The highlight was 45.5 M Of 3.73 G/T AUEQ WITHIN 525 M Of 1.01 G/T AUEQ.

Cardston, Alberta—(Newsfile Corp. – November 22, 2023)
—**American Creek Resources Ltd. (TSXV: AMK) (OTCQB: ACKRF)**
(“the Corporation” or “American Creek”) is pleased to announce
that project operator and JV partner Tudor Gold (“Tudor”) has
produced the fifth set of drill results for the 2023
exploration program (the “**Program**”) at the flagship property,
Treaty Creek, located in the heart of the Golden Triangle of

Northwestern British Columbia.

Tudor has safely and successfully completed the 2023 drilling program with a total of 31,904 meters (m) drilled within areas encompassing the Goldstorm Deposit and the Perfectstorm Zone.

The assay results reported in this release are from two drill holes that targeted the northeastern area of the Goldstorm Deposit and two holes that targeted the northeastern area of the Perfectstorm Zone.

Ken Konkin, Tudor Gold President and CEO, commented:

“We are extremely pleased to announce the continued expansion of the Goldstorm Deposit to the northeast. GS-23-179, a 200-meter step-out hole, has greatly enlarged the mineralized envelope.

“As predicted, the CS-600 system remains very robust with surprisingly high gold values in the upper portion of the domain. Although the gold-copper-silver mineralization remains consistent over very wide intercepts that yield compelling composites such as 525 m of 1.01 g/t AuEQ in hole GS-23-179, higher grade mineralization is well concentrated within core sections.

“The upper portion of this 525 m interval contains an enriched section that is believed to be part of a consistent

quartz stockwork system that can be traced for hundreds of meters between drill holes. This system has yielded an intercept of **10.07 g/t AuEQ over 12.0 m** within the uppermost portion of the **223.5 m of 1.42 g/t AuEQ** interval, which is part of a much longer **525 m intercept that averaged 1.01 g/t AuEQ.**

“Notably, this 12-meter-long, high-grade gold intercept within GS-23-179 is located over 300 m northeast from a similar gold-bearing stockwork intercept encountered in GS-23-134, which reported **9.96 g/t AuEQ over 25.5 m**, including an enriched portion of **20.86 g/t AuEQ over 4.5 m** (see Press Release July 19, 2022).

“Further drilling is required to confirm the orientation and extent of this newly discovered stockwork zone. Our technical team believes this auriferous stockwork veinlet system is a late-stage event that overprints the CS-600 Domain.”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
