Apollo Consolidated add additional high-grade mineralisation to add value to the Rebecca deposit

Apollo Consolidated (ASX: AOP) added further high grade gold mineralisation to their 840,000 oz Au Rebecca deposit, near Kalgoorlie, Western Australia.

Highlights:

Latest drilling at the 840,000 oz Au Rebecca deposit identifies new high-grade gold

mineralisation at shallow depths along the eastern edge of the optimised pit shell used to constrain the recent Mineral Resource Estimate (MRE) update.

Strong hits include:

- 7m @ 12.15g/t Au* and 15m @ 2.20g/t Au* in RCLR0795
- 23m @ 2.36g/t Au and 10m @ 3.42g/t Au* in RCLR0791
- 20m @ 2.44g/t Au* and 5m @ 2.31g/t Au in RCLR0790
- 10m @ 4.07g/t Au and 7m @ 1.98g/t Au in RCLR0796

New hits link and extend mineralisation associated with previous drill intercepts² including 6m @ 6.70g/t Au (RCLR0226) and 7.4m @ 4.70g/t Au (RCDLR0707).

These intercepts were treated as unclassified, and not included in the recent MRE

The continued discovery of new mineralisation within or close to the current MRE will add valuable near-surface high-grade material to the current pit constrained 29.1 Million tonnes at 1.2g/t Au for 1.105 Million ounces of gold .

Drilling continues, with step-out testing around these excellent results and working through a range of exciting exploration targets, including infill drilling at the Cleo discovery and initial testing of structural targets that sit under soil cover and along strike from known mineralisation

**intercept contains one or more composite sample that will now be resampled at 1m intervals.*

Rebecca RC Drilling

Ongoing drilling at the 840,000 oz Au Rebecca deposit, part of Apollo's 100%-owned Lake Rebecca Gold Project approximately

145 km east of Kalgoorlie in Western Australia, continues to make significant progress, with exploration and resource definition work finding new gold mineralisation at shallow depths along the eastern margin of the mineralised system, and upgrading areas where gold mineralisation within the optimised Rebecca pit shell was not yet drilled to a density that allowed resource classification.

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review

newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
