# Argosy Minerals Rincon Lithium Project Update and Progress Report

**Argosy Minerals Limited (ASX: AGY)** (“Argosy” or “Company”) is pleased to provide the following update on key developments at our Rincon Lithium Project.

## HIGHLIGHTS

- 2,000tpa operation works progressing;
- Comprehensive test works being conducted to determine optimum operational parameters and improve filtration rates
- Planned critical works schedule to improve operational performance and increase production operations
- EIA approval for 10,000tpa operation expansion awaited
- Resource expansion upgrade being finalised

# 2,000tpa Lithium Carbonate Operations

The Company continues to progress operational works at the 2,000tpa lithium carbonate facility targeting continuous production operations.

The main focus of works remains on the primary solids filtration circuit, aiming to improve filtration rates. Following delivery and installation of new filter cloths, comprehensive test-works are currently being conducted, including flowrate variation and filter press plate configuration to assess the operability of the new cloths.

The Company aims to determine the optimum operational parameters and achieve consistent and repeatable results during this test phase to then progress to ramping up production operations. In addition, receipt of ancillary parts and equipment for chemical preparation area modification works is being carried out whilst awaiting additional components to complete the remaining scheduled work plan.

The Company will continue its planned critical works schedule to improve the performance of the 2,000tpa facility, with a target to increase production operations during Q1-CY2024.

Production output remains constrained whilst implementing the rectification works and testing program. The Company has completed the current-cycle pond harvesting works, allowing increased pond utilisation and increasing production of concentrated lithium brine.

## **10,000tpa Environmental Impact Assessment Process**

The Company has made significant progress toward finalising the EIA process, with final updated hydrogeological data observations provided to the Mining Secretary's department.

Following this and recent dialogue with the Mining Secretary and key Salta government officials, official approval from the Mining Secretary is expected.

## **Resource Expansion Upgrade**

The Company completed its resource expansion exploration diamond drilling works program, received all laboratory results, and with our independent hydrogeologist, who is finalising the technical report for the upgraded brine Mineral Resource Estimate.

## **10,000tpa Operation Expansion Pre-Development Works**

The Company is continuing to progress applicable pre-development works for the 10,000tpa operation expansion, including process design reviews, evaporation pond design and engineering, industrial water drilling operations, EPCM service provider engagement, with the aim of a seamless progression into the development phase of the 10,000tpa facility (upon receipt of the EIA regulatory approval).

## Argosy Managing Director, Jerko Zuvela said,

*“The Company is advancing its priority works to achieve continuous production operations at our 2,000tpa lithium carbonate operation.*

*“In addition, significant progress has been made with the EIA approval, with an outcome expected shortly, whilst the resource expansion upgrade is ready and awaiting completion of the technical report.*

*“The Company is working toward finalising upcoming significant milestones that will support Argosy’s ambitions and near-term growth phase to fully develop the Rincon Lithium Project.”*

**City Investors Circle is based in  
the financial district in the City**

## of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email [andrew@city-investors-circle.com](mailto:andrew@city-investors-circle.com)
