Aris Mining Reports Q3 2026 Production

October 07, 2026

Year-to-date production up 16%; Marmato expansion advances toward first gold in Q4

VANCOUVER, British Columbia–(BUSINESS WIRE)– **Aris Mining Corporation (TSX: Aris)** reports gold production of 217.3 thousand ounces (koz) for the nine months ended September 30, 2026 (YTD 2026), up 16% from YTD 2025.

Based on year-to-date operating performance and the outlook

for the fourth quarter, the Company remains on track to meet the lower end of 2026 production guidance of 300,000 to 350,000 ounces. All amounts are in U.S. dollars unless otherwise indicated.

Neil Woodyer, Chair and CEO, commented,

“During the third quarter, we continued to advance our growth plans at both Segovia and Marmato.

“At Segovia, owner-mined tonnes increased approximately 23% from Q1 to Q3.

“Production from our external mining partners was affected earlier in the year by temporary constraints on access to explosives, which impacted their tonnes and grades.

“This issue was resolved in September under the new Colombian administration, positioning partner production to increase toward planned ramp-up levels.

“At Marmato, the new Cascabel 3 filtered tailings facility, a key component of the expansion project, has been commissioned.

“We used the associated planned downtime to carry out upgrades at the existing flotation plant, while construction of the new CIP plant continues to advance toward first gold in Q4.

“With mining underway in the Bulk Mining Zone, ore stockpiles building ahead of CIP commissioning, and the Cascabel 3 filtered tailing facility now operational, Marmato is well positioned heading into 2027.

“Together, the Segovia and Marmato expansions are expected to support annual gold production of approximately 500,000 ounces once fully ramped-up.”

Q3 2026 Highlights:¹

- Q3 2026 production of 69.3 koz, resulting in YTD 2026 production of 217.3 koz, up 16% from the same period in 2025.
- Q3 2026 gold sales of 68.4 koz at an average realized price of approximately \$4,204 per ounce, resulting in Q3 2026 gold revenue of approximately \$287 million and over \$972 million on a year-to-date basis.
- The Marmato expansion project achieved another key milestone with the commissioning of the new Cascabel 3 filtered tailings facility. The planned transition from

Cascabel 2 required approximately four weeks of flotation plant downtime, which was used to complete upgrades and extensive maintenance and contributed to lower production in Q3 2026.

- The refurbishment of the primary ball mill and the installation of a new regrind mill and Knelson concentrator have increased the Marmato flotation plant's capacity to 1,250 tonnes per day (tpd).
- Marmato's 5,000 tpd CIP plant remains on track for first gold in Q4 2026.
- Cash balance of \$419 million at September 30, 2026, including \$42 million from the third and final Marmato construction funding instalment from Wheaton Precious Metals.
- The Toroparu Prefeasibility Study remains on track for completion in Q4 2026.
- At Soto Norte, the technical mine plan has been approved by the ANM and preparation of the Environmental and Social Impact Assessment has been completed for community engagement.
