

# Avalon to host their own investor conference

Avalon Advanced Materials Inc. {TSX: AVL}

Invites its shareholders and other interested parties to attend a real-time, interactive presentation on Thursday, May 7<sup>th</sup>, at 2.30 pm GMT

## Avalon Advanced Materials to

# Webcast Live May 7, 9:30 am ET

Avalon Advanced Materials Inc. invites its shareholders and other interested parties to attend a real-time, interactive presentation on [VirtualInvestorConferences.com](https://VirtualInvestorConferences.com).

DATE: Thursday, May 7<sup>th</sup>

TIME: 9:30 am ET

LINK: <https://www.virtualinvestorconferences.com/events/event-details/otcqx-resource-company-virtual-investor-conference>

If attendees are not able to join the event live on the day of the conference, an archived webcast will also be made available after the event. It is recommended that investors pre-register and run the online system check to expedite participation and receive event updates.

## Current Company Activities

- Avalon is currently evaluating the opportunity to apply an innovative, new extraction technology to recover rare earths and other metals from acid mine drainage at closed mine sites, and subsequently remediate their environmental liabilities. Initial laboratory test results are encouraging and Avalon plans to work with the innovator of this new technology to begin operation of a demonstration facility to scale up the process as a first step toward commercialization. Avalon is also actively seeking other opportunities related to

extracting value from waste materials that offer potential for near term revenue streams.

- Process development work continues on Avalon's Separation Rapids Lithium Project (Kenora, Ontario) to produce high-purity petalite product samples for glass-ceramic manufacturers who have expressed strong interest in Avalon's product. The Company is planning to proceed this summer with the recovery of a bulk sample for processing to recover product samples for customer qualification, while continuing to look at opportunities to produce lithium battery materials.
- Avalon also plans to re-activate its Lilypad Tantalum-Cesium Project (Fort Hope, Ontario) this summer. In addition to the global need for establishing new cesium supply chains, there is also renewed interest in tantalum, another technology metal with limited supplies from non-conflict sources.

#### **About Avalon Advanced Materials Inc.**

[Avalon Advanced Materials Inc.](#) is a Canadian mineral development company specialising in sustainably-produced materials for clean technology. The Company now has four advanced stage projects, providing investors with exposure to lithium, tin and indium, as well as rare earth elements, tantalum, cesium and zirconium.

Avalon is currently focusing on developing its Separation Rapids Lithium Project near Kenora, Ontario while looking at several new project opportunities, including re-activating its 100%-owned Lilypad Tantalum-Cesium Project in northwestern Ontario. Social responsibility and environmental stewardship are corporate cornerstones.
