

Awalé Updates on Drilling at High-Grade Gold Target

[Awalé Resources \(TSX.V: ARIC\)](#)

Provided an update on exploration activities at the Charger target within the Odienné Project in the Ivory Coast.

The Charger zone stands out with some of the highest-grade intercepts in West Africa in the last 12 months, including 32m @ 45.7 g/t Au from 165m downhole in OEDD-83.

Awalé Updates on Drilling at High-Grade Gold Charger Target, Odienné Project

Toronto, Ontario, March 13, 2025 – **Awalé Resources Limited (TSXV: ARIC)** (“Awalé” or the “Company”) is pleased to provide an update on exploration activities at the Charger target within the Odienné Project (“Odienné” or the “Project”) in Côte d’Ivoire.

HIGHLIGHTS

- *The Charger zone stands out with some of the highest-grade intercepts in West Africa in the last 12 months, including 32m @ 45.7 g/t Au from 165m downhole in*

OEDD-83. Awalé is now following up on these high-grade intersections.

- Charger is a near-surface, high-grade gold discovery hosted within a 200m-long breccia corridor.
- Ten holes have been completed at Charger, with drilling on two more in progress, with results expected in April/May 2025.

Andrew Chubb, CEO of Awalé Resources commented:

“Charger has already delivered some of the highest-grade gold intercepts in West Africa, and we believe we are only beginning to unlock its full potential.

“With the current drill program well underway, we are systematically testing Charger’s northeast trending corridor to confirm continuity and volume potential.

“Drilling to date has consistently intersected the breccia target, warranting an extension of the initial program based on these encouraging observations.

“This phase of drilling will play a critical role in our broader strategy to define a district-scale gold system at Odienné.”
