Banyan Gold management comments

"The next phase of exploration at the AurMac Property is well

underway, with three diamond drills now turning.

“With the denser drill spacing to refine mineralization continuity in the northeast of the Powerline Deposit wrapping up, we are excited to get back to 100 m step-out drilling designed to demonstrate the size potential of the near/on-surface Powerline Deposit mineralization to the east and west.

“This latest batch of assay results from our 2021 drill program continues to showcase the extensive nature of gold mineralization around the Powerline Deposit on the AurMac Property.”

Tara Christie, President & CEO of Banyan Gold
