## Bardoc Gold Management Comments

*"North Kanowna Star was emerging as an exceptional longterm exploration target.*

*"The scale of the alteration and mineralisation across the North Kanowna Star project area is truly exceptional, extending over more than 3km in length, similar in strike to the Zoroastrian/Excelsior corridor that forms the backbone of our 3.07Moz Bardoc Gold Project.*

*"North Kanowna Star is emerging as a long-term exploration project, where we see an opportunity to delineate substantial new Resources with the potential to provide strong additional value to the Bardoc Gold Project.*

*"Our exploration team has identified more than ten high priority prospects, with technical work now underway to integrate the geological, geophysical and geochemical data to rank the prospects and develop follow-up exploration programs."*

**Bardoc Gold's Executive Director, Neil Biddle.**

## North Kanowna Star

The North Kanowna Star Project contains multiple prospects over a 3km strike. The presence of strong gold anomalism over such a large area makes it a highly-significant location within the local geological landscape.
