## **Barton Gold High Resolution Gravity Survey Targets Challenger Repeats**

*Targeting near-mine indications of high-grade quartz vein lodes*

Barton Gold Holdings Limited (ASX:BGD, OTCQB:BGDFF, FRA:BGD3) (Barton or Company) is pleased to confirm the start of a high resolution airborne gravity survey surrounding its South Australian Challenger Gold Project (Challenger).

The program is part of Barton's research and development (R&D)

initiatives trialling various technologies in historically under-explored terrain to define new geological models.

## HIGHLIGHTS

- High resolution survey over northern portion of EL 6502, which hosts the Challenger Gold Mine
- Targeting gravity anomalies indicative of structures similar to Challenger's high-grade gold lodes

**Barton Managing Director Alexander Scanlon said:**

*"With a DFS underway for the phased restart of operations at Challenger, leveraging our Central Gawler Mill, we are diligently pursuing our regional enhancement strategy.*

*"This includes not only our Tarcoola and Wudinna blending feed projects, but also the potential for near-mine repeats of Challenger's high-grade quartz vein lodes.*

*"Challenger was developed during a period of record low gold prices, and as such historical investment favoured rapid development over local exploration. With existing infrastructure, new discoveries could be highly valuable."*
