## Barton Gold High Grade Assays Confirm New Tolmer Gold System

Significant alteration zone with shallow quartz sulphide veining

**Barton Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF)** (Barton or Company) is pleased to announce high-grade assays from the Tarcoola Goldfield at the Tarcoola Gold Project (Tarcoola) in South Australia.

Assays have now confirmed a new gold mineralised system at Tolmer, comprised of quartz veining within a broader zone of alteration.

Further Perseverance Mine assays remain outstanding.

# HIGHLIGHTS

- Recent seismic survey mapped several new and untested structures across the historical high-grade Tarcoola Goldfield, and identified key targets for 'repeats' of the Perseverance gold system
- During May-July 2024 Barton completed ~10,000m reverse circulation (RC) drilling to validate its structural interpretation, and target further mineralisation in the Perseverance open pit mine
- New high-grade assay results have confirmed a newly interpreted gold mineralised system at Tolmer, comprised of quartz sulphide veining hosted within broader zones of alteration

- **New significant assay results include:**

| Hole ID | Interval (m) | Grade (g/t Au) | Depth (m) | Target Area |

- Additional Perseverance Mine open pit floor drilling assays outstanding.

## Commenting on the latest Tarcoola exploration drilling results, Barton MD Alexander Scanlon said:

*"We are excited to confirm that the first significant test of Tarcoola's new structural model has confirmed a new gold mineralised system at Tolmer.*

*"We have also successfully intersected high-grade mineralisation at multiple other targets, demonstrating Tarcoola's broader potential to host multiple shallow, high-grade gold zones.*

*"We are also awaiting further assay results from the open pit Perseverance Mine, where we are hoping to convert further shallow mineralisation in the pit floor into additional high-grade Resources for a 'Stage 1' operation.*

*"This is another step toward the realisation of our lower-cost, lower-risk development strategy leveraging our existing processing infrastructure, and we are only just scratching the surface of the broader regional potential."*
