Barton Gold Reports 17,600g/t Silver Intersected at Tarcoola's Tolmer Prospect

Barton Gold (ASX:BGD)

Announced further high-grade assays from the Tolmer prospect at its South Australian Tarcoola Gold Project, where recent assays have confirmed high-grade gold and silver mineralisation.

Additional multi-element assays have identified further near surface mineralisation grading up to 17,600 g/t silver.

Barton Gold Reports 17,600g/t Silver Intersected at Tarcoola's Tolmer Prospect

28,000 gram-metres silver drilled less than 50 metres from surface

Barton Gold (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to announce further high-grade assays from the Tolmer prospect (Tolmer) at its South Australian Tarcoola Gold Project (Tarcoola), where recent assays have confirmed

high-grade gold and silver mineralisation.

Additional multi-element assays have identified further near surface mineralisation grading up to 17,600 g/t Ag.

These assays also suggest the potential for new styles of high-grade mineralisation

at Tolmer, with the highest-grade silver assays appearing independent of gold and within a broad halo of anomalous lead mineralisation.

HIGHLIGHTS

- High-grade silver recently identified within Tarcoola Project's new 'Tolmer' gold system
- Additional shallow aircore (AC) drilling results have returned further high-grade silver in association with a broad zone of anomalous lead, with new significant assays including: Hole ID Interval / [depth] Including:

TBAC102 11m @ 0.73 g/t Au and 165 g/t Ag [9m] 3m @ 2.28 g/t Au and 439 g/t Ag [16m] TBAC130 17m @ <0.02 g/t Au* and 109 g/t Ag [7m]

6m @ <0.02 g/t Au* and 4,747 g/t Ag [46m]

3m @ 314 g/t Ag [9m]

lm @ 17,600 g/t Ag [46m]

- * Note: field-based gold (Au) assays below detection limit of $0.02\ \text{g/t}\ \text{Au}$
- Previous significant gold and silver assays from Tolmer reverse circulation (RC) drilling include:1

Hole ID Interval / [depth] Including:

TBM0145 1m @ 2.16 g/t Au and 241 g/t Ag [79m]

TBM0161 4m @ 24.6 g/t Au and 82.8 g/t Ag [95m] 1m @ 83.6 g/t Au and 312 g/t Ag [97m]

• Gold and silver assays for 2,230m Tolmer reverse circulation (RC) drilling remain outstanding

Commenting on Tolmer's latest highgrade silver assays, Barton MD Alexander Scanlon said:

"This is an exciting addition to our recent Tolmer discovery.

"This style of silver-dominant mineralisation appears to be previously unrecognised in the Tarcoola Goldfield, and the best intersection of 6m @ 4,747 g/t silver sits within 50 metres of surface — shallower than our neighbouring historical high-grade Perseverance Mine.

"That 6m @ 4,747 g/t silver intersection also sits within the transitional zone between the oxidised and fresh domains.

"The AC drilling was unable to penetrate the underlying hard quartzite fresh rock, and we have already completed 2,230 metres of RC drilling to test for extensions of gold and silver mineralisation below this horizon.

"Assays for the follow up RC drilling are expected shortly.

We look forward to sharing the results."

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting

companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.
