

# Barton Gold's Soil Assays Indicate Extensions and New Targets

## Barton Gold (ASX:BGD)

Announced the assay results of ultrafine soil sampling programs completed at the Tolmer and Black Oak Tank prospects of its South Australian Tarcoola Gold Project.

These showed extensions of the high-grade 'western silver zone', and similar new previously untested targets located between the 'western silver zone' and the 'eastern gold zone'.

## Barton Gold's New Soil Assays Indicate Extensions and New Targets at Tolmer

Barton Gold Holdings Limited (ASX:BGD, OTCQB:BGDFF, FRA:BGD3) (Barton or Company) is pleased to announce the assay results of ultrafine soil sampling programs completed at the Tolmer and Black Oak Tank prospects of its South Australian Tarcoola Gold Project (Tarcoola).

### New assay results for these programs indicate potential for:

- o Tolmer: extensions of the high-grade 'western silver zone', and similar new previously untested targets located between the 'western silver zone' and the 'eastern gold zone'; and
- o Black Oak Tank: potential for interpreted structures to host continuous gold mineralisation.

Samples were collected during July 2025 over a ~1.9km<sup>2</sup> surface

area surrounding the Tolmer gold and silver discoveries, along with a ~23km<sup>2</sup> area covering the LLSZ, both located on the Company's Tarcoola tenements.

## **Barton Managing Director Alexander Scanlon Commented;**

*"These assays provide the first hints as to orientation at Tolmer, indicating a potential overall northwest-southeast trend to the western silver zone and the potential for material extensions of its high-grade silver-gold footprint.*

*"We have also identified potential new opportunities located between the 'western silver' and 'eastern gold' zones, where coincident Au-Ag-Pb anomalies present secondary targets analogous to the more prominent footprint of the 'western silver zone'.*

*"We expect that pending assays from our recent diamond drilling program in the 'eastern gold zone' will materially assist our interpretation of local structural controls, and guide follow up drilling targeting."*
