Bitcoin (BTC)

BTC has performed well in 2020, rising 40% and once again approaching the \$10,000 mark, although that is currently proving to be a resistance level.

Surprisingly, the belweather bitcoin has been outperformed by some other altcoins, such as [Tezos \(XTZ\)](#) up 118%, [Binance Coin\(BNB\)](#) up 120%, and [Lisk \(LSK\)](#).up 450% this year.
