

# Cabral Gold Identifies Gold-in-Oxide Blanket, Trenches 18M @ 1.9 g/t

**Cabral Gold (TSX.V: CBR)**

Announced trench results from the Jerimum Cima target and the identification of a fifth gold-in-oxide blanket within the Cuiú Cuiú Gold District, Brazil.

Highlights included surface trench CT050 at the Jerimum Cima target returned 18m @ 1.9 g/t gold including 1m @ 22.8 g/t gold in weathered gold-in-oxide blanket material at surface, at Cuiú Cuiú.

**Cabral Gold Identifies Fifth  
Gold-in-Oxide Blanket and  
Trenches 18M @ 1.9 g/t Gold  
on Surface at the Jerimum**

# Cima Target, Cuiú Cuiú Gold District, Brazil

14th November 2024

Vancouver, British Columbia—(Newsfile Corp. – November 14, 2024) –**Cabral Gold Inc. (TSXV: CBR) (OTC Pink: CBGZF) (“Cabral” or the “Company”)** is pleased to announce trench results from the Jerimum Cima target and the identification of a fifth gold-in-oxide blanket within the Cuiú Cuiú Gold District, Brazil.

## Highlights

- Surface trench CT050 at the Jerimum Cima target at Cuiú Cuiú returned **18m @ 1.9 g/t gold** including **1m @ 22.8 g/t gold** in weathered gold-in-oxide blanket material at surface. The trench also returned results of **0.8m @ 47.6 g/t gold** (which remains open), 3m @ 0.5 g/t gold, 2m @ 0.3 g/t gold, and 1m @ 2.4 g/t gold
- These results, together with previous reconnaissance drilling, indicate the presence of a fifth gold-in-oxide blanket at Cuiú Cuiú which appears to extend over an area of 900 x 1000 metres. The other gold-in-oxide blankets with Inferred and Indicated resources are Central, MG, PDM and Machichie. Only the Indicated resources at Central and MG were included in the recently released pre-feasibility study
- Previous reconnaissance drilling at the Jerimum Cima target, to the east of trench CT050 returned gold values of **14m @ 1.6 g/t gold, 20m @ 1.2 g/t gold, 10m @ 1.3 g/t gold and 24m @ 0.7 g/t gold** in weathered gold-in-oxide

blanket and saprolite material.

## Alan Carter, Cabral's President and CEO, commented,

*"The surface trench results from CT050 at the Jerimum Cima target confirm that we have a fifth gold-in-oxide blanket within the Cuiú Cuiú gold district.*

*"The results demonstrate the presence of extensive gold-in-oxide mineralization of excellent grade at Jerimum Cima.*

*"This is likely to have a very positive impact on the recent PFS study on a starter heap-leach operation which only considered mining gold-in-oxide material from the MG and Central gold deposits.*

*"The potential to upgrade Inferred material at both MG and Central and the likelihood of adding additional Indicated material with further material at the PDM and Machichie discoveries and now at Jerimum Cima, bode very well for growing the overall gold-in-oxide resource base.*

*"Furthermore, the presence of zones of higher-grade gold mineralization in the near surface saprolite to the east of*

*the Jerimum Cima area that was previously targeted by the reconnaissance drilling, suggests that those zones of higher-grade mineralization may be more extensive than previously envisaged, with a high likelihood of extending into the underlying bedrock.”*

**City Investors Circle is based in the financial district in the City of London**

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email [andrew@city-investors-circle.com](mailto:andrew@city-investors-circle.com)
