

Cabral Gold Trenches 20m @ 3.6 g/t Gold at Machichie

[Cabral Gold Inc. \(TSX.V: CBR\)](#)

Released assay results from two surface trenches and eight reverse circulation drill holes at the Machichie Main gold deposit within the Cuiu Cuiu gold district, Brazil.

Surface trench CT051 at Cuiu Cuiu returned 20 metres of 3.6 grams per tonne gold, including four metres of 15.7 g/t gold in gold-in-oxide material at surface.

**CABRAL GOLD TRENCHES 20M @
3.6 G/T GOLD ON SURFACE AT
THE MACHICHIE MAIN GOLD
DEPOSIT, CUIU CUIU GOLD
DISTRICT, BRAZIL**

Cabral Gold Inc. (TSX.V: CBR) has released assay results from

two surface trenches and eight reverse circulation drill holes at the Machichie Main gold deposit within the Cuiu Cuiu gold district, Brazil.

Highlights:

- Surface trench CT051 at the Machichie Main gold deposit at Cuiu Cuiu returned 20 metres of 3.6 grams per tonne gold, including four metres of 15.7 g/t gold in gold-in-oxide material at surface. The mineralized interval within the trench is open to the north and south. These results confirm the presence of significant higher-grade mineralization within the near-surface gold-in-oxide material at the Machichie Main deposit.
- Surface trench CT052, developed 150 m west of trench CT051, also returned seven m of 0.8 g/t gold. The mineralized interval is again open to the north and south.
- Reverse circulation drill results from Machichie Main include:
 - Four m of 3.9 g/t gold from 36-metre depth including one m of 10.6 g/t gold in RC497;
 - Four m of 3.1 g/t gold from 41-metre depth including one m of 10.6 g/t gold in RC496;
 - Seven m of 1.5 g/t gold from 64-metre depth in RC494;
 - Seven m of 1.2 g/t gold from 78-metre depth in RC495;
 - One m of 9.9 g/t gold from 26-metre depth and one m of 7.3 g/t gold from 37-metre depth in RC503;
 - All of these intercepts were in fresh rock intrusive material below the near-surface gold-in-oxide material.
- Results thus far from the trenches and initial drill holes confirm continuity and grade of the Machichie

mineralization along strike and at depth.

- Samples from the trenches are in the process of metallurgical testing to characterize the Machichie oxide zone.

Alan Carter, Cabral's president and chief executive officer, commented:

"The current drilling and trenching program at Machichie Main is aimed primarily at upgrading the inferred resource base within the near-surface gold-in-oxide zone to indicated resources.

"These results confirm the presence of significant grades, both within the near-surface gold-in-oxide material, which comprises mineralized blanket sediments and saprolite (weathered bedrock), as well as the underlying fresh primary intrusive material at Machichie Main.

"The trench results in particular are significant because they confirm the presence of excellent grades within gold-in-oxide material at surface.

"This bodes very well for our efforts to upgrade the inferred resources at Machichie Main as we work towards updating the results from the PFS study on an initial heap-leach starter operation previously released in October, 2024."

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review

newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

=====

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.
