## Darren Hall, President and Chief Executive Officer of Calibre, stated :

*“These drill results at Eastern Borosi reinforce the potential for discovery and resource expansion within the 176 km<sup>2</sup> Eastern Borosi land package.*

*“Moreover, the exceptionally high silver grades demonstrate further potential to capture additional value in the future.*

*“During the second quarter of 2023, Calibre achieved a significant milestone as we commenced mining from our high-grade Guapinol open pit (see [news release dated April 18, 2023](#)).*

*“Today’s high-grade results, combined with the established Mineral Resource base at Eastern Borosi and the potential for mine life extension at our Guapinol operation, confirm the significant mineral endowment of the district.*

*“In addition, the 7,281 km<sup>2</sup> Atlantic Mineral Concessions are at an early stage but have high potential for the discovery of both epithermal gold-silver and porphyry copper-gold mineral systems.”*
