"The 2024 exploration budget includes regional geophysics, drilling, till sampling, and trenching.

"Our initial exploration focuses on prioritizing new regional target identification along with resource expansion in previously drilled areas.

"Diamond drilling is underway at the <u>recently announced high</u> <u>grade gold discovery</u> along the southwest edge of the Leprechaun pit highlighting the strong resource expansion potential along the VLSZ toward the Frank Zone ("Frank"), which does not yet have Mineral Resources.

"Below the Marathon, Berry and Leprechaun pits the gold system remains open for expansion and we see excellent potential for additional high-grade gold mineralization as supported by drill results including 150.27 g/t Au over 4.3 metres.

"New discoveries combined with several exciting surface anomalies and high-grade exploration results, confirm the excellent potential within the Valentine region that is expected to yield a continuous flow of exciting discovery and resource-building results throughout 2024 and beyond."
