

Calidus Resources Spear Hill “significant lithium find”

Calidus Resources (ASX: CAI)

Reported a “significant discovery of lithium pegmatite”, which now stretches over a distance of 43 km in the Pilbara region of Western Australia.

As a result, and as predicted here some time ago, Calidus is planning to spin out Pirra Lithium and IPO it on the ASX some time later this year. [...]

Pirra Lithium – Lithium outcropping at surface

Spear Hill emerges as significant lithium discovery with pegmatites now stretching over 4.3km

More strong results with grades up to 2.35% Li₂O in outcrops

Support plan to spin-off Pirra later this year

HIGHLIGHTS

- Calidus' 50 per cent owned Pirra Lithium has significantly expanded the mapped lithium pegmatites at Spear Hill, in WA's Pilbara
- Outcropping pegmatites now established over total strike length of 4.3km

- A batch of 30 rock-chip samples yielded lithium grades up to 2.35% Li₂O and 808ppm Ta

- Plan to demerge Pirra and undertake IPO in 2022

Calidus Resources Limited (ASX:CAI) is pleased to announce that more strong results

have almost doubled the known strike length of the outcropping lithium-bearing

pegmatites at the Spear Hill lithium discovery to 4.3km.

The latest results come from further rock-chip sampling and mapping by Pirra Lithium,

which is owned equally by Calidus and Haoma Mining NL2

.
Assays have been received for a further 30 rock-chip samples from a newly discovered pegmatite swarm 1.7km south-west of the original discovery area^{1,3}.

The samples were collected from three exposed pegmatites and areas of muscovite and lepidolite alteration over nearly 1.8km of strike length.

The recent mapping and assays have nearly doubled the area of lithium-bearing pegmatites in the Spear Hill area.

.

Calidus Resources / Pirra Lithium management comments

“This discovery of another significant pegmatite outcrop in the vicinity of the previously announced results confirms the presence of a significant lithium pegmatite system.

“These results have provided additional drill targets that demand to be tested.

“The expansion of the mineralised system at Spear Hill reinforces the substantial prospectivity across the large tenement package and rights owned by Pirra Lithium.

“As a result, the shareholders of Pirra Lithium have decided to commence a demerger process and IPO of Pirra Lithium later this year”.

Calidus Resources Managing Director Dave Reeves

(Please note the final comment above, as predicted by myself some weeks ago, it always looked on the cards!)
