Cartier Resources drills 13.3 m of 2.5 g/t Au at Chimo

2023-06-06 10:08 ET – News Release

Mr. Philippe Cloutier reports

WEST CHIMO MINE SECTOR SHOWS NEW EXPLORATION POTENTIAL FOR

CARTIER

Cartier Resources Inc.TSX.V: ECR) has released drill hole results from the program that is in progress at the Chimo mine project. The new results are from the West Chimo mine sector, located between the main underground infrastructures of the Chimo mine and up to 550 metres west of them. The Chimo mine property, which is 100 per cent owned by Cartier, is located 45 kilometres east of the Val d'Or mining camp.

Philippe Cloutier, President and CEO commented,

"These drill results in the West Chimo mine sector clearly reveal the discovery potential of this new exploration sector, adjacent to the underground infrastructures of the Chimo mine.

"This sector has limited historical exploration and the gold zones known to date must be drilled further to increase their dimensions in order to optimize the full potential for increasing the resources of the Chimo mine project."

West Chimo mine sector:

- Continuity below the 4BW gold zone: Drilling intersected 3.7 grams per tonne Au over six metres, including 20.2 g/t Au over one m, and 1.6 g/t Au over 15 m, including 22.8 g/t Au over 0.5 m. These new results, located below the 4BW gold zone, demonstrate the continuity at depth in order to increase its dimensions and resources.
- New gold-bearing intersections within the 5N structure: Drilling intersected 4.5 g/t Au over five m, including 14.7 g/t Au over one m, and 3.3 g/t Au over three m, including 7.4 g/t Au over one m. These new results, located 300 m west of the Chimo mine underground infrastructures, add to the historical results of 1.3 g/t Au over 13.7 m (drill hole 175-108) and 1.7 g/t Au over 7.8 m (drill hole 01-84-64) outlining the occurrence of a potential new gold zone.

New gold-bearing intersections within the 6 structure: Drilling intersected 2.5 g/t Au over 13.3 m, including 8.9 g/t Au over 0.5 m. These new results, located 350 m west of the Chimo mine underground infrastructures, add to the historical results of 1.6 g/t Au over 7.1 m, including 5.1 g/t Au over 0.5 m (drill hole 07-87-32) in the 6 gold structure.

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
