Catalyst secures gold price protection regime

Catalyst Metals Limited (Catalyst or the Company) (ASX:CYL) has entered into gold forward contracts of 30,000 ounces of gold at a fixed price of A$6,075 per ounce.

Deliveries are spread evenly over 15-months at 2,000 ounces per month, commencing August 2026.

This amounts to 2% of Reserves or one quarter of production.

This structure gives Catalyst flexibility to deliver early into contracts should prices fall quickly, while also retaining the majority of gold price exposure should prices rise over this period.

Gold price volatility of the kind the industry has experienced recently can be destabilising.

While gold prices can change daily, operations take time to change. To address this inherent risk, a short-term price protection regime is prudent to manage volatility and ensure greater operational stability.
