

Catalyst Metals Reports High-Grade Gold At Old Highway

Catalyst Metals (ASX: CYL)

Reported positive drilling results from the Old Highway gold deposit, located 40km south of the Plutonic Belt.

The results are from a drilling program targeting extensions of mineralisation outside of the Resource envelope.

Drilling at Old Highway gold deposit demonstrates growth potential at depth

Catalyst Metals Limited (Catalyst or the Company) (ASX:CYL) is pleased to report drilling results from the Old Highway gold deposit, located 40km south of the Plutonic Belt.

The results are from a drilling program targeting extensions of mineralisation outside of the Resource envelope.

Highlights

26m at 5.9g/t Au, 300m below the existing Resource encourages further exploration

- Old Highway is an undeveloped gold project located 40km south-west of the underutilised Plutonic processing plant, along the Great Northern Highway
- It sits on existing mining leases and has a Resource (underground and open pit) of 206koz at 3.0 g/t Au, including a higher-grade underground component of 140koz at 4.6 g/t gold
- A Reserve of 140koz at 3.2 g/t Au underpins a four-year mine life at annual steady state gold production of 35kozpa3
- In late 2025, drill rigs were mobilised to Old Highway with a view to growing the Resource and extending mine life beyond the initial four years
- Much of the historical drilling at Old Highway has been shallow (less than 200m). Drilling at depth by Catalyst has returned a number of high-grade assays which indicate the potential for the deposit to grow
- Results include:
 - o 26m at 5.9g/t Au
 - o 8m at 10.5g/t Au
 - o 22m at 3.1g/t Au
 - o 21m at 3.2g/t Au
 - o 30m at 2.2g/t Au
 - o 10m at 5.3g/t Au
 - o 3m at 16.7g/t Au
 - o 5.5m at 5.2g/t Au
 - o 14m at 3.0g/t Au

- Old Highway will be the fifth deposit to be developed by Catalyst in its plan to grow gold production from ±100koz pa to ±200koz pa
- The development plan will mirror Catalyst's Trident development – a small, self-funded open pit followed by a longer life, high-grade underground mine – giving Catalyst confidence in reducing future development risk
- Catalyst is currently progressing approvals in line with its expected timeline

Catalyst's Managing Director & CEO, James Champion de Crespigny, commented:

"Plutonic is a very large mineral system.

"Catalyst is investing the money to daylight the historically high-grade deposits that have laid neglected through many years of foreign distracted owners."

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
