## **Catalyst Metals Reports Record Plutonic gold production**

**Catalyst Metals ( ASX: CYL)** recorded quarterly production at Plutonic of 28,176oz of gold under Catalyst ownership.

Settlement of inherited legal dispute paves the way for acceleration of mining and exploration at Plutonic's fourth ore source – K2.

# Quarterly Highlights

- Record quarterly production at Plutonic of 28,176oz of gold under Catalyst ownership
- Settlement of inherited legal dispute paves the way for acceleration of mining and exploration at Plutonic's fourth ore source – K2

## Production

- Three mines were operating across the Plutonic Belt during the quarter – Plutonic Main, Plutonic East and Trident open pit
- Gold produced for the quarter was 28,176oz at an average AISC of A\$2,565/oz produced (AISC of \$2,776/oz sold)
- Catalyst retains guidance of 100 – 110koz of gold at an AISC of A\$2,200/oz – A\$2,650/oz

## Growth & Exploration

- Development of K2 continues to progress with first ore expected before 30 June 2026
- Mining of the Trident open pit expected to conclude in the first half of CY2026 with development of the underground mine commencing soon after
- Exploration activities continued at Old Highway and Cinnamon, targeting Resource growth
- Drill rigs mobilised to K2 to commence a range of programs including Resource growth, grade control and step out drilling
- Drilling results at Cinnamon including 22m at 14.3g/t Au and 7m at 29.8g/t Au doubled the strike length of the Cinnamon trend and opened up high-

grade potential beneath  
the existing Resource

- Exploration drilling resumed in Bendigo, while approval was obtained for the exploration tunnel at Four Eagles. The remaining 49% ownership in the Tandarra project was also acquired during the quarter

## Financial and Corporate

Operating cashflow (after all sustaining capital and corporate costs) was A\$74m. Of this, A\$5m was then spent on non-discretionary capital (power station, camp etc), A\$22m on non-recurring items (legal settlement, stamp duty), A\$16m on discretionary growth capital (Trident, K2 & OHW project development) and A\$24m on exploration

Cash and bullion at quarter end was A\$238m, an increase on the prior quarter while maintaining increased exploration and development project spend, and settling legal disputes.

Catalyst is debt free and holds an undrawn A\$100m corporate revolving facility, providing liquidity of A\$338m

Catalyst Metals' flagship asset is the 40km long Plutonic Gold Belt in Central Western Australia. This belt currently produces ~100koz pa at a target AISC of A\$2,425/oz from two mines at Plutonic Main and Plutonic East.

Catalyst is currently bringing three new mines into production – Trident, K2 & Old Highway. Each will be processed through the existing, underutilised and centrally located 2Mtpa CIL processing plant.

Exploration is targeting down dip extensions of each of these

deposits.

With the development and exploration of these five deposits, Catalyst aims to increase Reserves and production from 1.5Moz to ±2Moz and ±100koz to ±200koz annually.

### **MANAGEMENT COMMENTARY**

*“Record gold production for the quarter is pleasing. The operating risk for the business continues to fall as new mines come online.*

*“Before 30 June we will be producing from four mines on the belt – a terrific outcome from the team considering less than two and a half years ago Plutonic was near bankrupt, producing from only one mine!*

*“Exploration results at Cinnamon are encouraging as are further results expected this quarter from Trident, Old Highway and K2.”*
