City Investors Circle – Monthly Review January 2021

The monthly Review for January 2021 has been issued, with comments on battery metals, copper, Robinhood traders, gold, silver, coking coal, and lithium.

The main theme in the general section is an explanation of the US based Robinhood traders, and what they're trying to achieve. There is now a growing UK based Reddit community that are looking to pump share prices, so this is very relevant to what may occur on the London market in the coming weeks.

The Reddit US group is moving onto silver now, so we may see some strange moves in silver junior stocks and the **SLV ETF**.

The City Investors Circle Monthly Review is published at the

end of each month, and focuses briefly on general market moves, and the reasons for them, and specifically on the mining and metals markets.

We look at what is driving metal prices higher or lower, and which of our watchlist companies may be affected as a result.

We focus on junior mining companies listed on the Australian Stock Exchange (ASX), The Toronto Stock Exchange (TSX), and the Toronto Venture Exchange (TSX.V).

We welcome your views, suggestions, and comments about junior mining companies listed on the ASX and TSX exchanges.

If you have any questions about any companies featured on the website or in the newsletter, you are welcome to contact me and I will endeavour to find the answer from the company, or provide you with the correct contact details so that you may ask the company concerned directly.
