***Comment***

*Formerly called Libero Copper, Copper Giant has a good project in what is now, mining friendly Colombia.*

*The company is well financed for a decent drill program in a prolific copper / molybedenum belt.*

*Of the six major copper mines opened in the last ten years, management have been involved in two of them, one in Panama, one in Ecuador.*

*The 13% shareholding of Frank Giustra, and management's experience attracted me to this stock, which I intend to keep as a long term hold providing the company maintains it stated objectives.*

*I prefer investments where management have significant skin in the game, and at 29% management here are clearly aligned with their shareholders.*
