

Corazon Confirms Extended High-Grade Wembley Gold System

Corazon Mining (ASX: CZN)

Reported assay results from its maiden reverse circulation drilling program at the Wembley gold prospect, part of the Company’s Feather Cap Gold Project in Western Australia.

The 2,000 m, 20-hole RC program was completed on schedule in August 2026, testing beneath and along strike from the historic Wembley Line workings.

Corazon Confirms High-Grade Wembley Gold System, Extends Mineralisation Along Strike

Corazon Mining Limited (ASX: CZN) (“Corazon” or the “Company”) is pleased to report assay results from its maiden reverse circulation (RC) drilling program at the Wembley gold prospect, part of the Company’s Feather Cap Gold Project in Western Australia.

The 2,000 m, 20-hole RC program was completed on schedule in August 2026, testing beneath and along strike from the historic Wembley Line workings as well as the interpreted regional Wembley structure.

Results confirm shallow, high-grade gold mineralisation along the Wembley Line and mark the first modern, systematic drilling at the prospect, establishing a technical foundation for further extension and resource-focused drilling.

Highlights

- Maiden reverse circulation (RC) drilling has validated and extended the high-grade Wembley Line of workings at the Wembley gold prospect.

- Standout intercepts include:

- o 4 m @ 10.60 g/t Au from 66 m (26FRC010);

04 m @ 9.20 g/t Au from 65 m (26FRC004);

- The best intercept (26FRC010) sits approximately 60m east of historic drilling, and the mineralised structure remains open at depth, pointing to scale beyond the historic footprint.
- Anomalous gold has been intersected along a second, previously untested offset from the Wembley Line, opening a further target within the same area.
- Results provide the first modern, systematic dataset supporting follow-up drilling toward an initial Exploration Target and a potential maiden Mineral Resource Estimate at Wembley.

Corazon Mining Limited Managing Director, Simon Coyle, commented:

“These are outstanding first results from our maiden drilling program at Wembley.

“Not only have we reproduced the shallow, high-grade gold mineralisation seen in the historical drilling, we have extended it along strike and demonstrated that the Wembley Line is a coherent, structurally controlled gold system.

“Intercepts of 4 m at 10.6 g/t, 4 m at 9.2 g/t and 2 m at 5.7 g/t are exactly the type of results we set out to find. They give us confidence that the Wembley system has meaningful scale and that further drilling can grow it materially.

“These are extremely positive results for growth and further underpin the potential for a maiden Mineral Resource Estimate at Wembley in due course.”

[City Investors Circle is based in the financial district in the City of London](#)

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
