# CORNISH METALS CONTINUES TO INTERSECT HIGH GRADE TIN, COPPER, SILVER AND ZINC AT UNITED DOWNS

Vancouver, November 3, 2021      **Cornish Metals Inc. (TSX-V / AIM: CUSN)** (“Cornish Metals” or the “Company”) is pleased to report assay results from two diamond drill holes, UD21-006

and UD21-008, which are part of the ongoing drill programme at the United Downs copper – tin project, Cornwall UK.

## Cornish Metals management comments

*“These results continue to demonstrate the presence of multiple mineralised structures within the UD Lode target area.*

*“The intercepts in the latest holes do not appear to be part of UD Lode itself but represent new sub-parallel zones of mineralisation, including some exceptionally high tin grades.*

*“This is the first time we have encountered high-grade zinc mineralisation, which occurs as coarse black sphalerite, and also note the high silver grades associated with the copper-rich zones. Additional drilling is required to understand the geometry and scale of these zones.*

*“The continued discovery of new mineralization by the current drilling underscores the prospective and under-explored nature of the United Downs area for near surface tin, copper, zinc and silver.*

*“The drill programme continues and results will be reported as and when received.”*

**Richard Williams, CEO Cornish Metals**

Cornish Metals owns a 100% interest in the South Crofty tin and United Downs copper / tin projects, plus additional mineral rights located in Cornwall, UK.

The Company recently published an updated Mineral Resource Estimate for South Crofty (see news release dated [June 9, 2021](#)), as summarised below.

The “South Crofty Tin Project Mineral Resource Update” report, dated June 9, 2021, authored by Mr. N. Szebor, CGeol (London), EuroGeol, FGS, of AMC Consultants (UK) Ltd, can be accessed on the Company’s website.
