## Cyprium Metals management comments

*"When I was at Maroochydhore last year, I was absolutely blown away by the physical footprint of this shallow copper cobalt deposit, which is more than 3 kilometres in length and still open.*

*"Maroochydhore is a very exciting project and we are pleased to announce the results of our first round of RC drilling. These results reinforce the quality of this large copper-cobalt deposit. In addition, this drilling has increased the oxide-supergene resource potential further to the east.*

*"The presence of fresh sulphide mineralisation at the base of hole 21MDRC018 is highly encouraging and demonstrates potential to expand the sulphide resource further along strike. We look forward to the next round of assay results, targeting areas northwest along strike."*
