Mr. Todd Beavis reports

ENVIROLEACH TECHNOLOGIES INC RECEIVES FEDERAL FUNDING FOR RESEARCH

Enviroleach Technologies Inc. will receive a non-repayable contribution of up to \$95,000 from the National Research Council of Canada industrial research assistance program (NRC IRAP), a federally funded program that supports the research and development of innovative Canadian technologies, products or services.

This funding will be used in the continued advancement of Enviroleach's proprietary chemistry and related technologies.

"We are very pleased to secure funding and advisory support from NRC IRAP," **stated Duane Nelson, Enviroleach's president and chief executive officer.** "The research completed under this program should enhance Enviroleach's commercialization efforts in our target sectors: mining and e-waste."

About Enviroleach Technologies Inc.

Enviroleach Technologies is a technology company that is engaged in the development and commercialization of environmentally friendly formulas and technologies for the treatment of materials in the mining and e-waste sectors. Using its proprietary non-cyanide, water-based, near-neutral pH treatment process, Enviroleach extracts precious metals from ores, concentrates and e-waste using only Food and Drug Administration-approved additives and ambient temperature water.
