

Fiore Gold – New video presentation

FI^QRE GOLD

Fiore Gold {TSX.V: F}

CEO and director Tim Warman has just presented to the Swiss German Commodity TV Channel.

This presentation is bang up to date, and worthwhile watching to appreciate the potential of Fiore, in production, with a new, upcoming, low cost to production project, Gold Rocks, and in the safe jurisdiction of Nevada, USA.

Comment

I recently met Tim 'virtually' as meetings are currently, and was impressed by his knowledge of Nevada goldmines, and his cool presentation style.

What I like about Fiore is that they are prudent with their cash, going as far as digging a dirt road the five miles from their Pan mine to their new project, Gold Rock for the grand total of US\$26,000 using their own bulldozer and trucks.

Fiore have a strong treasury with \$9 million cash, and no debt.

The pan Mine produces strong cashflow, and all sales are unhedged.

They have new drilling at Pan plus a PEA at Gold Rock to come this year, so Fiore is much more than just a production play.

in my view Fiore sits in a niche between developers and large scale producers, and that looks a very good place to be right now as holders of fully valued large caps look for value further down the food chain.

CEO and director Tim Warman has just presented to the Swiss German Commodity TV Channel.

This presentation is up to date and worthwhile watching it appreciate the potential of Fiore, in production, with a new, upcoming, low cost to production gold project at Gold Rock, and in the safe jurisdiction of Nevada, in the USA.

Fiore also have a nice little 2 million gold resource up in Seattle at Golden Eagle, that they are talking to [Kinross](#) and [Hecla Mining](#) about doing a three way split, as Kinross have a useful mill nearby on care and maintenance, and some of the mineralisation spills onto Hecla's land.
