Fosterville South mnageent comments

"Fosterville South continues to operate multiple drill rigs on different projects within the large 4,000 sq km land package we have assembled over a multi-year period.

“After extensive fieldwork to identify priority targets, the reconnaissance drilling to date has further assisted in prioritizing our target database. Assay results from several high priority areas are now pending.

“The Reedy Creek goldfield, described in today’s news, is now yielding high grade intercepts at a number of prospects with more targets yet to be drilled. As an example, the Doyle’s/Langridge prospect was the largest high-grade producer and is slated for near term drilling.

“The entire field is looking very promising.”
