

G2 Drills Best Holes to Date in New OKO Surface Discovery

G2 Goldfields Inc. (TSX: GTW0)

Announced new the best assay results to date from the Company's ongoing drilling program in the greater OKO-AREMU district, Guyana.

G2 currently holds exploration rights to 83,967 acres in the district and the New Oko Discovery Area represents the third significant gold discovery on the Company's holdings.

G2 Drills Best Holes to Date in New OK0 Surface Discovery

TORONTO, July 15, 2025 (GLOBE NEWSWIRE) –**G2 Goldfields Inc.** (“G2” or the “Company”) (**TSX: GTW0**; OTCQX: GUYGF) announces new assay results from the Company’s ongoing drilling program in the greater OK0-AREMU district, Guyana.

G2 currently holds exploration rights to 83,967 acres in the district and the New Oko Discovery Area represents the third significant gold discovery on the Company’s holdings.

Drill results within this release are part of an ongoing program from a new discovery initially announced in March (see press releases dated March 18, April 1, April 28 and June 9, 2025, available on SEDAR+ and the Company’s website) which lies 10km north of its existing gold resources at the Oko-Ghanie Deposit (**1.5 million ounces indicated** at 3.40 g/t Au and **1.6 million ounces inferred** at 2.48 g/t Au).

Highlights

- Drilling intersects broad zones of high-grade gold mineralization down plunge of original Discovery Zone
- High grade intersections include:
 - AMD30 –**5.9g/t Au over 60 metres(m)**including**9.3g/t Au over 22.5m**
 - AMD50 –**2.2g/t Au over 99.9m**including**5.5g/t Au over 25.5m**
 - AMD37 –**3.0g/t Au over 51.0m**including**6.3g/t Au over 10.5m**
- Five drill rigs active in the Discovery Area
- Updated Mineral Resource Estimate (MRE) and Preliminary Economic Assessment (PEA) anticipated in Q4 2025

Multiple gold targets have been delineated north of existing resources along a 15km trend.

Figure 1 – Plan View of District Target Areas

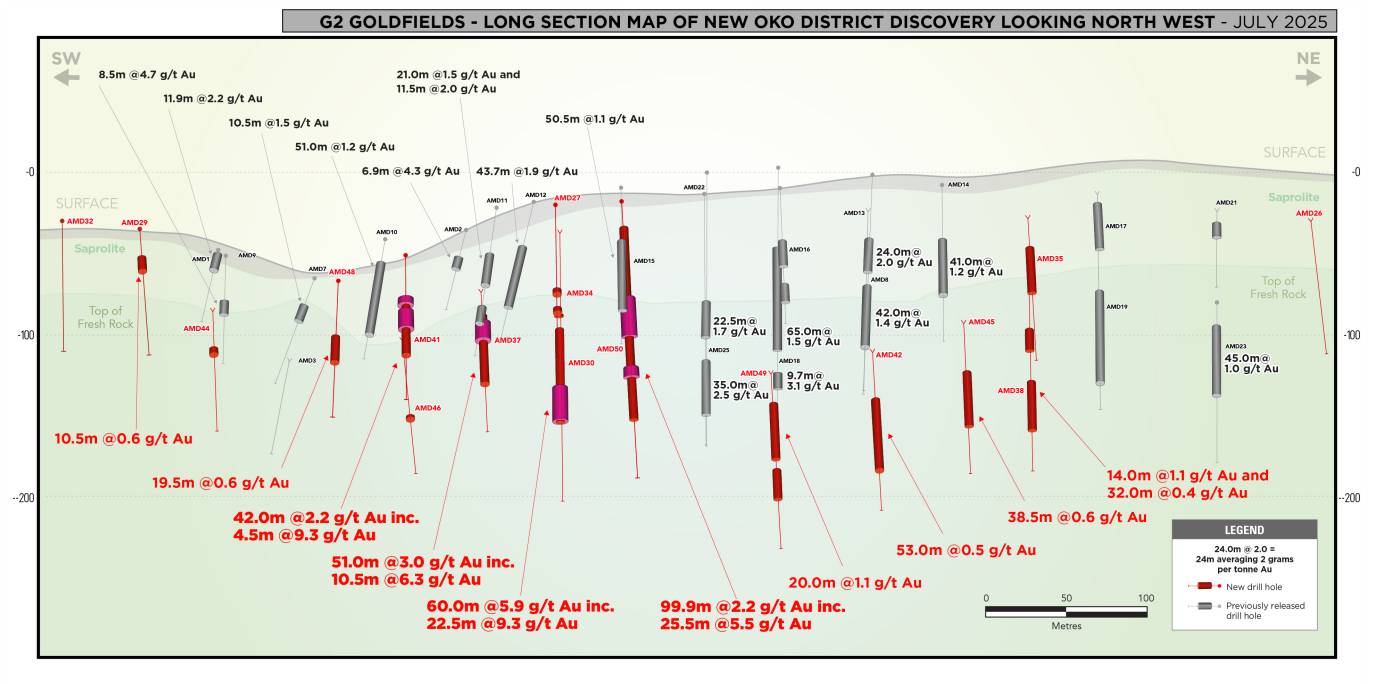

G2 has completed 69 diamond drill holes totalling 13,239m in the New Oko Discovery Area, where 56 of these holes targeted the 'Main Shear'. This release provides assay results for 25 drill holes (AMD26 to AMD50 inclusive) totalling 4,113m, of which, 17 holes targeted the Main Shear Zone. Complete results for all 25 holes are available [here](#)

Discussion of Results

Drilling is primarily focused on exploring for gold mineralisation down-plunge of previously reported near surface gold intercepts. Broad zones of gold mineralisation were intercepted at vertical depths of up to 150m, with a distinct high-grade zone of mineralisation encountered in the south-western portion of the 700m long zone.

Discovery

north of the New OKO Discovery and require further work.

Figure 4 – Plan View of New OKO Discovery

Boaz Wade, VP Exploration,

commented;

“This round of drilling, which was aimed at targeting higher grade zones, has delivered the two best down-hole intercepts on the New Oko Discovery to date.

“The other drill holes indicate continuity of mineralization within a plunging high-grade shoot as well as along strike in the broader shear structure.

“Extensions to the high-grade zone intersected by holes AMD30 and AMD50 will be part of the target areas for the next phase of drilling as we aim to aggressively advance exploration on this discovery with multiple drill rigs.”

Dan Noone, CEO, added:

“These are some of the best holes drilled in the region to date. Near surface, high-grade hits like these bode well for our upcoming mineral resource estimate expected

“in early Q4 2025 – the Company’s fourth resource estimate in the last three years – as well as a Preliminary Economic Assessment (PEA) expected in Q4 2025.”

**City Investors Circle is based in the financial district in
the City of London**

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
