Reno, Nevada, November 1, 2022 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX)** (“**i-80**”, or the “**Company**”) is pleased to announce additional high-grade results from the 2022 underground drill program at the Company’s Granite Creek Property (“**Granite Creek**” or the “**Property**”) located in Humboldt County, Nevada.

A primary target of the 2022 program was to perform delineation and expansion drilling of the Ogee Zone, expected to provide the bulk of mineralization to be mined in the next twelve months.

drilling focused on the area between the bottom level of the mine workings and the deepest hole drilled by i-80 to date, designed to test the Ogee Zone depth extension of iGS21-15, which intersected multiple high-grade mineralized horizons, including **13.3 g/t Au over 13.1 m, 20.3 g/t Au over 7.5 m and 10.1 g/t Au over 17.5 m**

Highlight results from new underground drilling at Granite Creek include:

- **10.7 g/t Au over 7.0 m (0.31 oz/ton Au over 23.0 ft) – iGU22-43B**
- **28.2 g/t Au over 17.8 m (0.82 oz/ton Au over 58.3 ft) – iGU22-47**
- **16.3 g/t Au over 7.6 m (0.48 oz/ton Au over 25.0 ft) – iGU22-50**
- **49.0 g/t Au over 1.1 m (1.41 oz/ton Au over 3.6 ft) & 65.4 g/t Au over 1.6 m (1.91 oz/ton Au over 5.3 ft) – iGU22-51**
- **39.0 g/t Au over 9.5 m (1.14 oz/ton Au over 31.1 ft) & 11.9 g/t Au over 2.7 m (0.35 oz/ton Au over 8.7 ft) – iGU22-52**
- **20.1 g/t Au over 21.1 m (0.59 oz/ton Au over 69.3 ft) & 23.2 g/t Au over 4.7 m (0.68 oz/ton Au over 15.3 ft) – iGU22-53**

Multiple levels have been developed on the Ogee Zone and the Company continues extend of the decline to depth, with the goal of initiating access to the new South Pacific Zone that is located immediately below and to the north of the underground mine workings.

## Tyler Hill, Senior Geologist of i-80 stated;

*“Drilling in the Ogee Zone continues to intercept impressive high-grade mineralization over substantial widths.*

*“Results so far have demonstrated that the Ogee Zone is comprised primarily of oxide mineralization, amenable to non-refractory processing. The Ogee and South Pacific Zones remain open at depth, providing substantial upside.”*

**The Granite Creek Property** is strategically located proximal to Nevada Gold Mines’ Turquoise Ridge and Twin Creeks mines at the north end of the Battle Mountain-Eureka Trend, at its intersection with the Getchell gold belt in Nevada .

High-grade mineralization occurs in a near-identical geological setting as that at the multi-million ounce Turquoise Ridge Mine located immediately to the north; proximal to a major regional fault (the Getchell or Range Front fault) on the eastern edge of the large Osgood Mountains intrusive complex.

The Granite Creek deposit remains open at depth and along strike from the existing underground workings.

## **City Investors Circle is based in the financial district in the City of London**

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email [andrew@city-investors-circle.com](mailto:andrew@city-investors-circle.com)
