## Comment

This is very disappointing, and a glance at the chart above clearly illustrates why.

Why was I, as an existing investor, not invited to participate in this placing?

Effectively institutions are being let in on the cheap at the expense of existing shareholders, who have supported the company through to production, only to see the benefits of doing that transferred to new investors who are going to reap the benefit of our patience and support.

This is starting to become a recurring theme now, and once again the retail investor is being shafted by not having the opportunity to protect his position by buying at the same price as the institutions.
