The 2023 program continues to expand high-grade polymetallic mineralization in multiple zones and has resulted in new discoveries.

While awaiting approvals (now received) for additional land disturbance permitting the Company to construct road and drill pads for the expansion of the exploration program along the Hilltop Corridor, drilling has been focused on the Blackjack deposit and also the East Hilltop Zones.

These zones were discovered late in the 2022 program (East Hilltop skarn) and early in 2023 (East Hilltop CRD).

Drilling in 2023 has intersected high-grade mineralization in multiple target areas including in step-out drilling where mineralization remains wide open for expansion.

Tyler Hill, Chief Geologist of i-80 Gold stated,

“Drilling at Ruby Hill continues to return results that confirm the Property’s capability to be a flagship asset for i-80 with high-grade polymetallic base metal mineralization occurring immediately adjacent to the high-grade Ruby Deeps gold deposit.

”Our drill program demonstrates significant potential to expand mineralization with all zones open for expansion and multiple high-priority anomalies identified from geophysical surveys remain untested.”
