*“The Ruby Hill drill program continues to yield exceptional results in multiple target areas including the recent identification of high-grade polymetallic CRD mineralization in the Blackjack Zone.*

*“Step-out drilling is expanding mineralization in several zones with all known horizons remaining open for expansion.*

*“We are also compiling the results of recently completed geophysical surveys that have identified multiple high-priority anomalies that will be tested in the future.”*

Drilling continues to expand both polymetallic CRD and skarn mineralization in the Upper and East Hilltop Zones situated along the Hilltop fault structure where mineralization has now been defined over a strike length of approximately 750 metres including the Upper, Lower and East Hilltop Zones.

The current drilling program is also focused on the Blackjack

deposit, one of the primary polymetallic zones at Ruby Hill, where zones of gold mineralization are also being intersected.

*Step-out drilling is also demonstrating significant expansion potential in the Ruby Deeps gold deposit.*
