i-80 Gold Releases High-Grade Results from Underground Drilling at Granite Creek

Including 31.1 g/t Au over 21.9 m, 28.7 g/t over 16.5 m, 37.7 g/t Au over 7.6 m & 11.9 g/t Au over 21.6 m

Reno, Nevada, December 14, 2023 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX) (“i-80”, or the “Company”)** is pleased to announce high-grade results from the ongoing 2023 underground drill program that is targeting mineralization in the upper part of the South Pacific Zone at the Company’s Granite Creek Property (“Granite Creek” or “the Property”) located in Humboldt County, Nevada.

The 2023 surface and underground drilling campaign is focused on the delineation and expansion of mineralization within the South Pacific Zone (“SPZ”), and the conversion of some of the deposit to Measured and Indicated resource classification.

The SPZ is located immediately north of the Ogee Zone and the current mine workings, and is expected to become the primary zone for mining once developed in 2024. Mining of initial stopes is being planned for H1-2024 once mine workings are extended to provide access.

The underground drill program is focused on the upper part of the deposit, where initial mining is planned, while surface drilling is currently targeting the northern extension where drilling is also defining high-grade mineralization with recent results that include intervals of up to **15.5 g/t Au over 19.7 m** in iGS23-05.

Prior to hole GCPU23-19, underground drilling was completed in the current areas being mined in the Ogee Zone and subsequent drilling is focused on the SPZ. The initial results include some of the best results received to-date in the South Pacific Zone.

Highlight results from new underground drilling in the South Pacific Zone at Granite Creek include:

- GCPU23-19: 16.9 g/t Au over 5.7 m
- GCPU23-20: 37.7 g/t Au over 7.6 m
- GCPU23-21: 19.2 g/t Au over 4.3 m
- GCPU23-22: 31.1 g/t Au over 21.9 m
- GCPU23-25: 27.3 g/t Au over 4.0 m
- GCPU23-26: 19.5 g/t Au over 4.1 m
- GCPU23-30: 28.7 g/t Au over 16.5 m and 11.9 g/t Au over 21.6 m
- GCPU23-31: 20.6 g/t Au over 6.1 m
- GCPU23-32: 15.4 g/t Au over 7.9 m and 31.0 g/t Au over 2.4 m

Tyler Hill, Senior Geologist of i-80 Gold stated ,

“Both surface and underground drilling in the South Pacific Zone confirm impressive high-grade gold mineralization, including over substantial widths.

“It is expected to become the primary source of mineralization at Granite Creek beginning in mid-2024 and is comprised primarily of refractory mineralization that will be processed initially at Nevada Gold Mines’ Twin Creeks complex pursuant to our processing agreement.

“The South Pacific Zone remains open along strike to the north and at depth, providing considerable upside.”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
