City Investors Circle Initiating Coverage of Errington Metals

Errington Metals (TSX.V: EM) is an interesting company located in Sudbury Ontario, with an early resource of 13m tons of copper at a grade of 4% Copper equivalent.

Management have decent skin in the game, and previous experience of delivering shareholder value.

Highlights

Unlocking High-Grade Critical Metals in the Sudbury Basin

Errington Metals is redefining the exploration landscape in Canada's most prolific mining district.

Sudbury is globally renowned for copper-nickel-PGE deposits, but its massive, high-grade VMS potential has remained largely ignored, and hence underexplored..

Backed by a technically seasoned management team, board and advisors with exceptional track records of building companies, Errington is aggressively advancing its flagship Sudbury Basin Project to deliver superior long-term value for our shareholders and source metals for the global green transition.

The asset has over twice the grade of Foran, and superior infrastructure and location.

Management

David Harquail is ex Franco Nevada, and Dan Myersen has just sold Foran for C\$3.5 billion.

Management own over 22% of the company.

This week the company released good drill results, and a new campaign is planned to try and reach an asset of 20 million tons at around 4% copper equivalent.

I am planning to make an initial investment before the new round of drill results are announced.
