"I am very pleased with our team's performance during the third quarter, which included another strong performance by our Beta Hunt and Higginsville operations which have now delivered a total of 120,198 ounces through the first three quarters of 2023.

"Our gold processing operations have also performed very well, with average recoveries of 95% through Q3. The robust operating performance year to date puts us in a great position to achieve our full-year guidance ranges of between 145,000 to 160,000 ounces for gold production and AISC costs of between US\$1,100 to US\$1,250 for 2023.

"Comparing our performance year to date with last year, we've delivered strong improvements year-over-year with production

growing 24%, average milled grade up 11% and cash operating costs improving by 4%.

“At the Beta Hunt Mine, we continued to advance our expansion on schedule and on budget. The third and final ventilation raise installation is now complete, which will facilitate the ongoing expansion of our mining equipment fleet, putting us on track to grow Beta Hunt’s annualized production rate to 2.0 Mtpa by the end of 2024.

“At HGO, performance was strong in the third quarter as higher grades associated with the final stopes at the Aquarius Mine were processed. HGO production was up 17% and cash operating costs¹per ounce sold improved by 28% compared to the previous quarter.

“We ended the third quarter in a very strong financial position with a cash position of\$84 million, up \$13 million from the prior quarter, placing us in an excellent position to deliver on our growth objectives.

“We’ve also reported some very exciting exploration results from Beta Hunt, most recently in the Fletcher and Mason zones that point toward the potential for years of ongoing Mineral Resource additions outside the main zone of Western Flanks and A Zone.”

“On this front, I am looking forward to reporting our next

Mineral Resource update, which we expect to issue before year end.”
