Karora Resources Drill 6.5% Nickel Over 11.9m

Karora Resources Inc. (TSX: KRR)

Announced a new nickel discovery and positive results from its ongoing nickel drill program.

In the Hunt Block above Western Flanks, infill drilling of the existing gold Mineral Resource intersected high grade nickel mineralization in two holes above the gold Mineral Resource.

Karora Resources	TSX: KRR
Stage	Production + Development + Exploration
Metals	Gold + Nickel
Market cap	C\$538 million @ C\$3.13
Location	Kalgoorlie, Western Australia

Beta Hunt plan view highlighting + 1% nickel results for the February to August 2022 period and location of 4C Offset and 44C Ni Target.

Karora Resources Drills 6.5% Nickel Over 11.9 Metres In New 4C Offset Discovery

Located Only 25 Metres From Existing Mining Infrastructure At The Beta Hunt Mine

TORONTO, Sept. 14, 2022 /CNW/ — Karora Resources Inc. (TSX: KRR) (OTCQX: KRRGF) ("Karora" or the "Corporation") is pleased to announce a new nickel discovery and positive results from its ongoing nickel drill program.

In the Hunt Block above Western Flanks, infill drilling of the existing gold Mineral Resource intersected high grade nickel mineralization in two holes above the gold Mineral Resource.

This mineralization, interpreted as an offset to the 4C nickel trough mined by Reliance Mining ("Reliance") in 2004/05, is only 25 metres from existing development actively used for mining of the Western Flanks gold deposit.

Positive results were also received from drilling which is focused on upgrading and extending the 30C and 25C (south of the 30C) Mineral Resources.

A target zone parallel to Western Flanks, Stage 1 of the 44C drill program intersected nickel sulphides on and proximal to the ultramafic/basalt contact indicating potential for a repeat of the 40C trough, north of the Alpha Island Fault in the Hunt Block.

Paul Andre Huet, Chairman & CEO, commented:

"I am encouraged by the latest set of nickel drill results from both the 4C Offset nickel trough and the 44C target. The 4C Offset is located above the Western Flanks gold Mineral Resource and just 25 metres from the extensive existing Western Flanks mining infrastructure.

"This discovery is particularly exciting and significant because it represents a potential new high grade nickel zone that we can potentially mine in the near term. Additionally, the latest Beta Block drill results from the 30C and 25C nickel troughs reinforce the upside potential for Mineral Resource extensions and upgrades as outlined in the nickel PEA we announced last month for Beta Hunt.

"We expect ongoing drilling in the Hunt, Beta and Gamma Blocks to continue to demonstrate the significant potential Mineral Resource additions outside of the zones on which the PEA is based.

"Today's results also highlight the potential to identify new channels of nickel mineralization amenable to mining in the short term to accelerate the shift away from our current practice of remnant mining in historic nickel stopes.

"Encountering nickel intercepts such as **5.1**% **over 3.3 metres** and 4.6% over 1.3 metres certainly highlight the exciting potential that we are seeing as we execute our drill program."

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.
