Anthea Bath, President and Chief Executive Officer, commented,

“This quarter’s consolidated production of more than 50,000 ounces set a new high-water mark for Wesdome driven by record production from Eagle River.

“Eagle River had an exceptional third quarter, once again setting records for mill throughput and gold production.

“Benefits from ongoing efforts to debottleneck the mill, improve dilution, and increase ore availability are materializing and resulting in increased production at lower unit costs, all while advancing critical development. Eagle River is on track to deliver the high-end of full-year production guidance.

“As previously indicated, Kiena conducted a longer than planned hoist shutdown in July, which resulted in more than two weeks without mill feed.

“While forecasts at the time suggested that the shortfall could be recovered, inconsistent execution together with limited operational flexibility continued to impact performance through August and September.

“Kiena’s fourth quarter is expected to be its strongest of

the year, as high-grade ore from Kiena Deep is augmented by ore from Presqu'île.

"Kiena's 2025 guidance will be updated with the release of our financial results in early November. Importantly, we remain on track to meet full-year consolidated production guidance, albeit toward the lower end of the range.

"With record gold prices and strong production driving substantial free cash flow, our financial position continues to grow and strengthen – with $266 million in cash and total liquidity of more than $600 million at the end of September.

"This allows us to advance our organic growth initiatives while initiating a return of capital to shareholders.

"Accordingly, we have filed a notice of intention with the Toronto Stock Exchange to implement a normal course issuer bid for Wesdome shares.

"Responsible mining is at the heart of Wesdome's role as a trusted neighbour and employer."
