

Lahontan Drills High-Grade Oxide Gold From Surface at West Santa Fe

Lahontan Gold Corp. (TSX.V: LG)

Announced the final analytical results from the 2025 maiden drilling program at the Company's satellite West Santa Fe project, located only 13 km from Lahontan's flagship asset, the Santa Fe Mine project, in Nevada's prolific Walker Lane.

LAHONTAN DRILLS HIGH GRADE OXIDE GOLD FROM THE SURFACE AT WEST SANTA FE: 37m GRADING 3.11 g/t Au Eq INCLUDING 11m GRADING 5.75 g/t Au Eq

Toronto Ontario, February 24, 2026 – **Lahontan Gold Corp.** (TSX.V: **LG**, OTCQB:LGCFX, FSE:Y2F) (the “Company” or “Lahontan”) is pleased to announce the final analytical results from our 2025 maiden drilling program at the Company’s satellite West Santa Fe project, located only 13 km from Lahontan’s flagship asset, the Santa Fe Mine project, in Nevada’s prolific Walker Lane.

The assay results are from the final reverse-circulation rotary (“RC”) drill are summarized below:

- WSF25-04R: 36.6 metres (0.0 – 36.6m) grading 3.11 g/t Au Eq including 10.7 metres (1.5 – 12.2m) grading 5.75 g/t Au Eq

from the surface, all oxide.

The drill hole emphasizes the high gold and silver grades associated with the South Zone at West Santa Fe.

- Also included in the intercept is a second high grade zone: 12.2m (22.9 – 35.1m) grading 3.67 g/t Au Eq.
- The grade and geometry of these intercepts correlate well with adjacent historic drill holes, further validating the historic drill hole database. Numbers may not total precisely due to rounding.

Kimberly Ann, Lahontan Executive Chair, President, CEO, and Founder commented:

“The robust assay results from WSF25-04R confirm the high-grade core of the South Zone as defined by historic drilling and underground mine workings.

“We are continuing to model the West Santa Fe system to better understand the geology and geometry of gold and silver mineralization. The geologic team is also fine-tuning a followup RC drilling campaign to commence in Spring.

“Previous field work, including geologic mapping, rockchip sampling, and airborne magnetic surveys, confirms that the hydrothermal system at West Santa Fe extends at least 1,000 metres east of the main zone of gold and silver mineralization defined by Lahontan and historic drilling (please Lahontan Gold press release dated June 18, 2024).

“This possible extension of the main mineralized zone, plus untested down-dip extensions of gold and silver mineralization, will be the key targets of the Spring drilling campaign.

“West Santa Fe continues to be an exciting new exploration target for the Company, one with excellent potential to add important shallow, oxide gold and silver resource ounces to Lahontan’s mineral resource ledger.”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
