[Lithium Power Intl. {ASX: LPI}](#)

Announced the commencement of drilling on their 100% owned Tabba Tabba spodumene lithium project in Australia.

The initial Tabba Tabba drilling program has commenced with up to 4000 m of reverse circulation (RC) drilling planned to test outcropping pegmatites.

- Lithium Power International has commenced its initial drilling at the company's 100% owned Tabba Tabba Lithium project, located in Western Australia, which hosts important historical tantalum mineralisation and lithium discoveries.
- 4000 m of RC drilling is planned to test pegmatite targets in three parallel greenstone belts, with pegmatites located within an area of elevated lithium and other geochemistry over 4.3 km of strike.
