Los Cerros — Drilling at Ceibal porphyry target

Los Cerros Limited (ASX: LCL)

Has commissioned the first round of drilling at Ceibal, a new porphyry target with significant scale potential, 1km south west of the Company's Tesorito South porphyry discovery with the first hole currently underway.

Los Cerros — First drilling underway at Ceibal porphyry target

Los Cerros Limited (ASX: LCL) (Los Cerros or the Company), has commissioned the first round of drilling at Ceibal, a new porphyry target with significant scale potential, 1km south west of the Company's Tesorito South porphyry discovery with

the first hole currently underway.

Highlights

- First drilling has commenced at the newly identified porphyry target (Ceibal) ~1km southwest of Tesorito
- 800m x 600m Au-Cu-Mo surface geochemical anomaly with adjacent air magnetic anomaly
- New surface trench channel sample result of 90m @ 1.4g/t Au1 adds to two previously approunced channel samples of 75m @ 1.2g/t Au and 25m @ 1.2g/t
- announced channel samples of 75m @ 1.2g/t Au and 25m @ 1.2g/t Au2 $\,$
- Ceibal shares many similarities with Tesorito including regional structural setting and lithologies

Ceibal forms part of the 100% owned Quinchia Gold Project in Colombia — a cluster of porphyry targets surrounding the Miraflores Gold Deposit which includes the Tesorito surface porphyry, porphyry targets at Chuscal, an inferred Resource at Dosquebradas and a number of early-stage targets all within a 3km radius.

Ceibal has a substantial, 800m x 600m gold, copper and molybdenum, surface soil and rock chip geochemistry anomaly (no artisanal workings are present) on the shoulder of an air magnetic anomaly.

Ceibal's surface anomaly is broadly comparable in size and

tenor to that of

Tesorito and, like Tesorito, Ceibal is located within the Marmato Fault Corridor at a structural dilation or "jog". A field program launched last year logged outcrops and float of andesites and diorites similar to those encountered at Tesorito.

Trenching results across the anomalous zone has added to the excitement of this new target with significant surface gold reported in three channels;

- 90m @ 1.4g/t Au
- 75m @ 1.2g/t Au (previously announced)
- 25m @ 1.2g/t Au (previously announced)

The diamond rig has been transferred 1.5km NW from Chuscal to Ceibal for the initial program of scout holes.

Los Cerros Management Comments

"We are particularly excited about this new target as it has the surface fingerprint of classic porphyry occurrences, so we have directed the Chuscal rig to Ceibal to start the process of understanding this compelling target.

"The timing is ideal as we have a backlog of Chuscal assays pending and this break 1 45 channel samples ~2m each of insitu outcrop. Grades within reported intervals range from 0.51g/t to 3.11g/t Au (uncut).

"To drill Ceibal will also allow us time to assimilate that pending data before planning subsequent Chuscal holes.

"The emergence of Ceibal and Tesorito West, the new deep intercept encountered while drilling southwest and below the Tesorito South porphyry, is further argument that the Quinchia Gold Project is another significant hot spot on the mid-Cauca gold belt which already hosts many multi-million-ounce discoveries."

Los Cerros Managing Director, Jason Stirbinskis.

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com for information.

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.
