# Manganese miners, develops and explorers listed on the ASX and TSX

Manganese has sprung to the attention of mining investors after Elon Musk's announcement on the Tesla "Battery Day" that he was going to replace the expensive and unreliably sourced cobalt in a lithium-ion battery with manganese, normally a metal ignored by investors.

Two thirds of the world's manganese comes from S. Africa, China, and Australia.

This is led to people asking which are the companies involved with mining or developing manganese projects?

There are a few manganese mining companies listed on the ASX and TSX exchanges, please see the table below. (Please note the market cap shown is for guidance only, these were from earlier in the year and they will have have fluctuated since).

## City Investors Circle is based in the financial district of the City of London.

We present selected interesting and exciting junior mining companies listed on the ASX, TSX, and TSX Venture exchanges, to a group of city professionals, HNWI's, and private investors, all of whom are active investors, with a mandate to invest in junior mining companies. The format is round

table style.

Our audience is selected and individually invited, to ensure interest and relevance.
Meetings are small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our monthly newsletter.

If you wish to present to our select group of active mining investors, please email: **andrew@city-investors-circle.com** for information.

**This website is not sponsored.**

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects in good jurisdictions, run by an experienced management team.

These are not recommendations in any form.
