City Investors Circle Market Review May 2026

The highlighted company is **Talisker Resources**, Canadian company focused on the Bralorne Gold Project, a district-scale gold belt in British Columbia.

The company have started the Mustang Mine on a low capex model, and is using ore sorting and producing its first gold and trucking for toll-milling or off-take shipping. The company is now targeting its Olymous Mine at its second mine.

Talisker have a structured plan to raise production over a number of steps in the next five years.

The main news in May amongst our watchlist companies concerned the combination of **Equinox Gold** and **Orla Mining**.

This transaction will create a major Canadian gold mining company, with production of around 1.1 million ounces of gold per annum, with the potential to increase production to around 1.9 million ounces.

The new company, which will be called **Equinox Gold**, will have mines in Nicaragua, Mexico, the USA, and Canada. Economies of scale should reduce costs.
