RC drilling will continue through the March 2025 quarter at both Turnberry and
St Anne's.

Commenting on the drilling, Meeka’s Managing Director Tim Davidson said:

“It is pleasing to see thick zones of consistent, high-grade gold at Turnberry following the bonanza gold grades, exceeding two ounces per tonne, that we reported at St Anne’s last week.

“The results continue to highlight the strong production these open pits will deliver in the coming months as we commence mining.

“We are also starting to see a new gold zone, with grades over an ounce per tonne, outside and to the west of the Stage 1 Turnberry South open pit. A total of 4 holes reported in this release intersected this new western zone.

“Further assays are expected in January 2025 from the remaining 67 holes drilled during the December 2024 quarter.

“Drilling remains ongoing and results from 2025 drilling are expected in the March 2025 quarter.”
